#Code4SP

Formation of the national teams of curriculum providers and councilors (NCPCs)

NCPCs will consist of IT experts, mentors, and councilors that will help develop the methodological action plan/protocol that will be applied during the conduction of f2f meetings between NCPCs and trainees. Apart from the action plan, NCPCs will develop and establish a concrete methodological plan that will foresee the selection process of participants based upon certain and predefined criteria.

Stay Tuned: The Code4SP Pilot-Testing Activities are scheduled for September 2022!

20 Participants from Cyprus, Greece, and Portugal will be selected to participate in the pilot testing phases!

The training path perceived for Code4SP (and inherently based on CodeDoor's good practice) is designed to start learners on a path toward future studies in web development and design, no matter how little experience or technical knowledge they currently have.

Through the Code4SP training, learners will be introduced to the following topics:

- Introduction to Computer Programming
- HTML
- CSS
- SQL
- JavaScrip

Database of affiliated Regional, Local and National Enterprises:

If you are an IT company looking for future programming talents, we can collaborate!

The #Code4SP consortium will create an E-Directory where enterprises in each partner country can regularly recruit programmers.
